### Current Alerts

# **SITUATION SUMMARY**

## **Cathedral City, Residential Burn (New)**

- Cathedral City Fire Department, along with Federal and State Fire Agencies, will burn down a residence in Cathedral City tonight, 06/27/14. The residence is located within the Desert Gates Mobile Estates and was determined to contain bomb making materials.
- Approximately 63 residents are to be evacuated today at 1600 hours and are expected to be allowed to return on 06/28/14, provided there are no complications.
- A shelter will be established this afternoon at Cathedral City High School.
- Riverside County is working with Public Health to address the healthcare needs of the evacuees and with Animal Control to provide for pet care needs.
- A Cal OES Law Enforcement Branch Assistant Chief is assigned to the incident.
- The Cal OES Law Enforcement Duty Officer and Southern Region Duty Officer will continue to monitor the situation.

## **Cal EOC Incident – 2014 Drought**

- SOC / Inland REOC remains activated in support of 2014 Drought

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:**

#### **Eureka Weather:**

Light showers will continue this morning and taper off this afternoon as weak upper level disturbance passes by. Warmer and drier weather will return this weekend as high pressure builds over the region. High pressure will strengthen on Monday resulting in hot temperatures inland early next week.

#### **San Francisco Weather:**

Zonal flow will bring seasonable temperatures to the bay area today and Saturday. A noted warming trend will begin Sunday and peak Monday and Tuesday as inland temperatures soar into the 90s and lower 100s. Some cooling will return by midweek as onshore flow returns to the coast.

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY**

#### **Sacramento Weather:**

Clouds and a few light showers across the far north state today as a weak disturbance pivots through. Otherwise dry with warming temperatures today through the weekend as high pressure builds over the west coast. Daytime temperatures early next week from 10 to 15 degrees above normal with widespread Valley highs in the triple digits for Monday and Tuesday. A gradual slow cool down is expected for mid-week on.

#### **Hanford Weather:**

An upper level low moving out of the region will continue to create gusty winds over the kern county mountains and desert areas through tonight. High pressure will build into the area this weekend and temperatures will begin an upward trend through the middle of next week with temperatures running well above average next week.

## **WEATHER SYNOPSIS BY REGION: (Cont.)**

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

An upper trough will move east of the region today. Temperatures will be below normal, and it will be locally windy. An upper high will bring warmer weather this weekend, with decreasing night through morning clouds, and then temperatures will be well above normal, at least across interior sections Monday through Thursday.

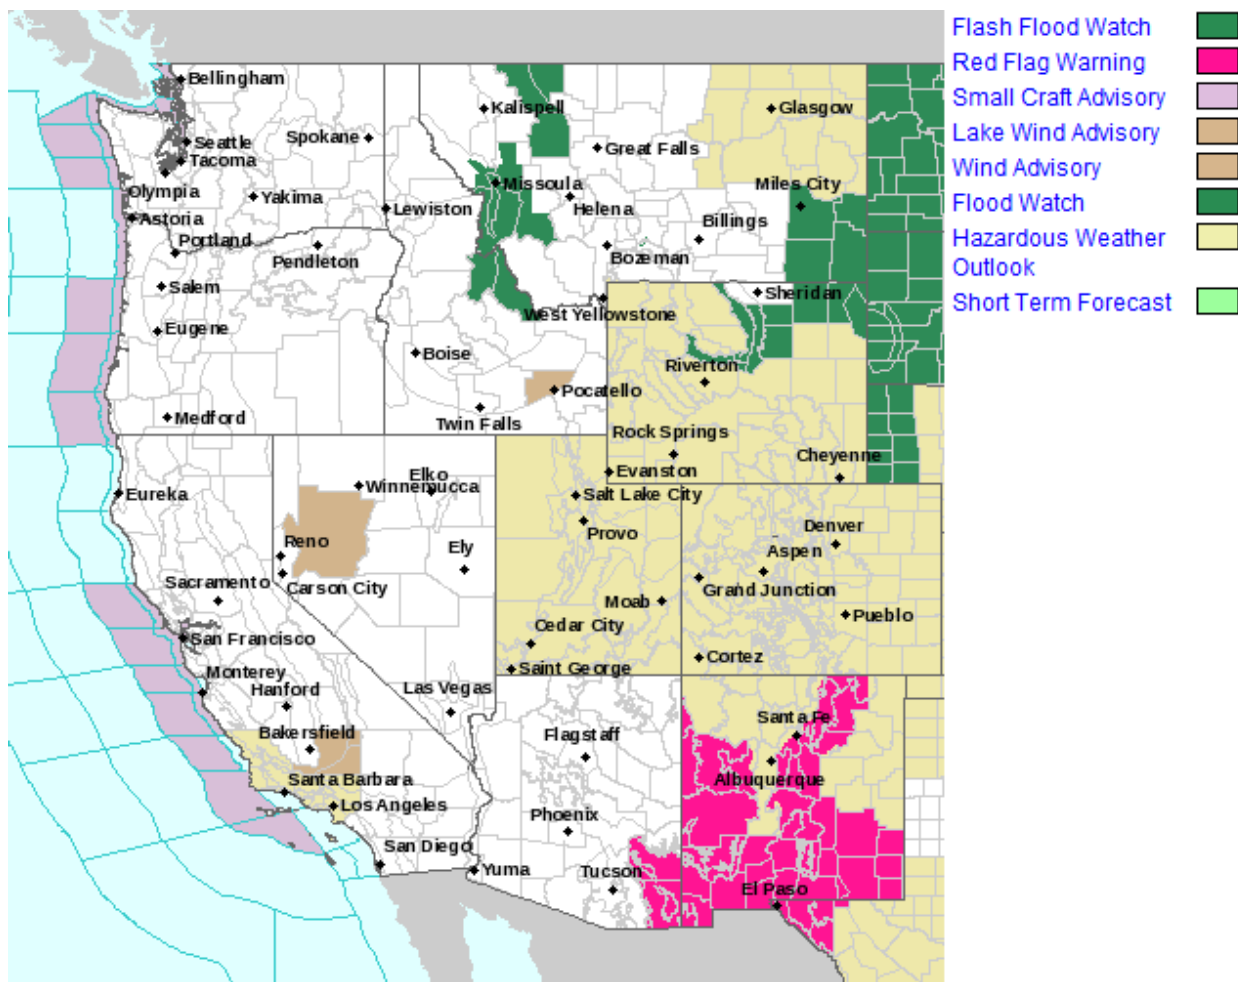

#### **Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

A trough of low pressure will move inland across California today and tonight, bringing a minor cooling trend across the inland areas as well as a deeper marine layer west of the mountains and locally strong and gusty west winds to the mountains and deserts through Friday. Zonal flow will prevail this weekend, with some minor warming possible across the inland areas. High pressure will then rebuild over California, with much warmer conditions developing for the work week, especially across the inland areas.

#### **Southeast California Weather:**

A weak area of low pressure passing by to the north will bring an increase in wind to the region and slightly cooler conditions today. A steady warming trend will take place this weekend and into early next week as high pressure builds over the region. Well above normal temperatures are expected by the middle of next week along with an increase in monsoon moisture.

# CAL OES ACTIVATIONS

## Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is 0800-1700 hours.

## **Cal EOC Incident – 2014 Drought**

### **Situational Summary**

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue without substantial rainfall, severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

On April 25, 2014 Governor Brown released an Executive Order on Friday enabling several urgent actions to be taken as the drought persists into the state's traditional dry season.

\*\* As this rainy season comes to an end, it is highly unlikely that precipitation totals will increase significantly over the coming months. This winter's below average rain and snowfall worsens conditions in this third straight dry year.\*\*

## Situational Summary (Cont.)

- The Taskforce continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- The final manual snowpack survey of the season was conducted on Thursday (May 1) and showed California snowpack at 18% of normal.
- DWR has announced that water essential for health and safety will be delivered through the state water project. The current State Water Project Allocation is 5%.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
